Laparoscopic (keyhole) neutering in female dogs

We now carryout keyhole spays, a minimally invasive surgery where a female dog's ovaries are removed through 2-3 small incisions rather than one larger incision, using specialist equipment. Eligible patients must be between 8kg-30kg. Please call our team on

01234 261622 to arrange a pre-operative health check with one of our vets or visit our website for FAQ's and costings.

Look out for the hidden dangers this party season....

At this time of year there are lots of treats and exciting new discoveries to explore in the house so please remember to make sure your pets are safe.

Here is a list of some of those dangers:

- Chocolate
- Grapes
- Onions
- Poinsettia, mistletoe, holly, amaryllis, ivy
- antifreeze
- Mince pies and Christmas pudding
- Christmas decorations and wrappers- a very exciting discovery for your pets but can be harmful if chewed or swallowed.

This does not mean that your pet has to miss out though, check out our shop where you will find plenty of pet toys to put in their stockings. You may even find a bag of doggy friendly chocolates or a turkey flavoured treat to get them in the festive spirit.

If you have any concerns with your pet over the festive period, please call 01234 261622.
